Project Description:

Library is one of the largest bookstores, offering a comprehensive collection of books in fields such as literature, history, and science, along with school supplies, electronics, and office equipment. With numerous branches, customers can visit any location to explore and purchase books or other products. The library carefully categorizes its collection, making it easy for customers to find exactly what they're looking for. Customers can shop in-store or conveniently place orders online. Branches are connected to customers through visits and orders, ensuring a seamless shopping experience, providing access to a variety of books and products either directly or through the online store.

Entity Relationship Diagram (ERD):

Relational Schema:

Branch(branch_No,location,phone_No)
Customer(name,email,Mship_ID,city,state,zip,phone_No)
Branch_Customer(branch_No,Mship_ID)
FKs:branch_No references Branch(branch_No)
Mship_ID references Customer(Mship_ID)

Order(Order_No,order_date,total_Price,order_status,Mship_ID)
FK: Mship_ID references Customer(Mship_ID)

Books(book_ISBN,author_name,publication_date)
Branch_Book(branch_No,book_ISBN)
FKs: branch_No references Branch(branch_No)
book_ISBN references Books(book_ISBN)

Order_Book(Order_No,book_ISBN)
FKs: Order_No references Order(Order_No)
book_ISBN references Books(book_ISBN)

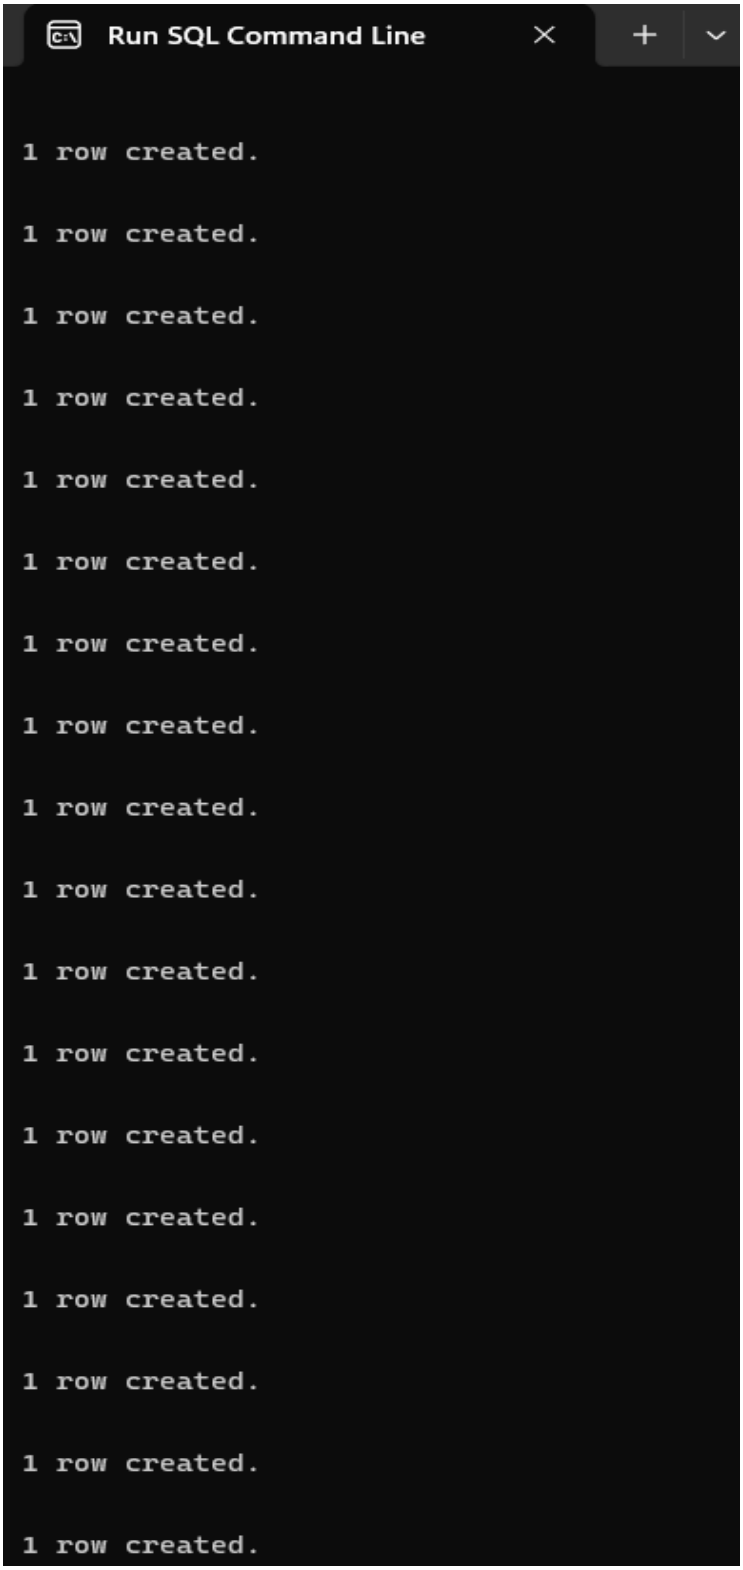

Category(category_ID,category_discription,category_name)
Category _Book(category_ID,book_ISBN)
FKs: category_ID references Category(category_ID)
book_ISBN references Books(book_ISBN)
